CODING EXPERIENCE

Solved 50+ coding challenges on HackerRank for Python.

TECHNICALSKILLS

- Data Collection & Cleansing
- SQL & Database Management
- Statistical Analysis & Modeling
- Data Visualization (Excel, Power BI, Tableau)
- Python (Pandas, NumPy, Matplotlib)
- Reporting & Dashboard Creation
- Problem Solving & Critical Thinking

CERTIFICATIONS

- NIIT | Software Engineering
- Coursera | Google Data Analytics
- TECH I.S. Data Science

Detail-oriented and analytical junior data analyst with a strong background in data manipulation, statistical analysis, and visualization. Skilled in utilizing Excel, SQL, and Python to efficiently gather, clean, and analyze large datasets. Committed to delivering accurate insights and actionable recommendations to drive informed decision-making.

EDUCATION

Expected in August 2025
Master of Science Data Science
Regis University, Denver, CO

December 2013
Bachelor of Science Computer Science and Programming
Kuvempu University, India

WORK HISTORY

October 2023 - June 2024
Junior Data Analyst *Performance Food Group*, Remote
- Data Collection and Cleaning: Assisting in the collection and cleaning of data to ensure its accuracy and reliability for analysis
- Data Analysis: Conducting basic data analysis tasks under the guidance of senior team members, such as data exploration, descriptive statistics, and basic data modeling
- Data Visualization: Assisting in the creation of visualizations and reports to present data findings in a clear and concise manner
- Data Quality Assurance: Participating in data quality assurance processes to identify and resolve data inconsistencies or errors
- Documentation: Documenting data analysis processes, methodologies, and findings to ensure transparency and reproducibility.

January 2023 - March 2023
Junior Data Analyst *Kaiser Permanente*, Remote
- Making reports and graphics to convey results
- By formatting and Cleaning making unprocessed data in use
- By using exploratory data analysis, they find trends and patterns in the data
- Helping top analysts with their modeling and statistical analysis
- Working together with cross-functional teams to resolve issues about data
- Keeping abreast with technologies and methods for data analysis.

May 2022 - July 2022
Entry Level Data Analyst *MODIS*, Remote
- Data Collection and Cleaning: Collect, clean, and preprocess large datasets to ensure accuracy and reliability for analysis

- Analysis and Interpretation: Conduct exploratory data analysis to identify trends, patterns, and correlations
  Interpret findings to provide meaningful insights to support business objectives
- Database Management: Assist in maintaining and updating databases, ensuring data integrity and accessibility for analysis.

April 2020 - May 2022
IT Support Specialist *Worldwide TechServices*, Colorado City, CO
- Install and maintain computer operating systems, hardware, and software packages. Provide technical assistance and resources on a regular basis.
- Collaborate with Network team to connect leased Multi-Function Printers to the network and configure scan to email functionality.
- Building and Maintaining Standard Windows's Images Deploying Software packages using SCCM
  Verify fresh hardware and software for compatibility with company systems.
- Maintained and updated Windows operating system monitors platforms and network infrastructure.
- Bit Locker Configuration and Management for Setup, Operating System Drive, Fixed Drive, Removable Drive and Client Management.
- Oversaw new installation wiring projects.
  Completed monthly preventative maintenance on all network related equipment installed on-site including tracking anti-virus, backup, and WSUS statuses Created, handled, and monitored trouble tickets using Remedy ticketing system,
- Routed tickets and participated in support bridges with on-call groups during outages. Charged with analyzing the configuration of all network TDM and VOIP based
  equipment.
- Handled monitoring network events during and after installation and configuration of the switches and routers.

July 2018 - January 2020
System Administrator *Code Logic Technologies Pvt. Ltd.*, Kathmandu, Nepal
- Research of emerging technologies for endpoint devices Planning and Implementing Hardware and software upgrades.
- Automated data backup processes, increasing network security and saving company resources Broad experience of IT with basic understanding of Networks, Servers, Audio/Visual, Smart Devices and Telecoms.
- Install, upgrade, support and troubleshoot for printers, computer hardware. Document incident and resolution information in Remedy tracking system Create, modify, and delete user accounts in Active Directory
- Real time ticket entry by utilizing, monitoring, and managing our service desk system Ordering of computer supplies and keeping of inventory.
- Provide second-level support on tickets escalated from the Service Desk staff regarding IT issues.

February 2016 - June 2018
System Administrator *Arihant Technologies Ltd*, Kathmandu, Nepal
- Building, configuring, patching, upgrading, and troubleshooting of physical and virtual windows servers (rack mounts/blades, and VMs)
- Supporting users in the use of computer equipment by providing necessary training and advice Diagnostic tools to troubleshoot problems

associated with network connectivity, and workstation hardware/software.

- Bit Locker Configuration and Management for Setup, Operating System Drive, Fixed Drive, Removable Drive and Client Management
- Installing, configuring, and deploying new PCs & Servers Monitor server event logs, performance logs, growth of data on the network, and checking the status of nightly server backups.
- Performs day-to-day maintenance and installation of server, network equipment, virtual machines, messaging, backups, and storage.
- Develop and maintain detailed maintenance and contingency plans and documentation Performs administration activities such as setting user accounts, roles, access, and privileges.
- Stabilized, expanded, and protected client network and PC environment. Built new file servers to maximize Web hosting, terminal server, file/print sharing and domain control performance.
- Monitor server event logs, performance logs, growth of data on the network, and checking the status of nightly server backups.
